

March 2010

Marigold Industrial® focuses on safety for both user and environment at SHE 2010

Hand & Arm Protection specialist Marigold Industrial® will be combining safety for both the user and the environment at this year's Safety & Health Expo, when it unveils its brand new range of gloves – the Puretough™ P Series.

The three glove range, is non-solvent and water-based, in addition to being Formaldehyde, Silicone, Phthalate (plasticizer), Azo Dye and DMF free, the Puretough™ P Series is breaking new ground in the glove market given its high level of environmental and user friendly features.

The Puretough™ P Series combines comfort, flexibility and grip, in addition to offering mechanical protection, in particular to cut level 5 for P5000, and cut level 3 from the P3000 making it an ideal range for those working with sharp materials or in quality control tasks or environments where the surfaces of objects need to remain clear of any marks or flaws.

Also present on the Marigold Industrial® stand will be the Nitrotough™ N1000 Series, launched in 2009 and proving to be an extremely popular range of gloves across food, engineering and mechanical industries.

With excellent levels of abrasion resistance, good tear resistance, flexibility, dexterity and comfort the Nitrotough™ N1000 Series is food approved and has achieved the Oeko-Tex 100 classification guaranteeing that the textiles used in the manufacture of the new gloves are carcinogen free are tested against pesticides and phenol chlorine, contain no heavy metals, have little or no formaldehyde, have a neutral pH and are accelerator free with no added biocides.
