Marigold Industrial® adds sparkle to its Nitrotough™ range at H+S10 Scotland

Hand protection expert, Marigold Industrial Ltd will be adding some sparkle to its highly renowned Nitrotough™ Range with the unveiling of a brand new glove at H+S10 Scotland.

The company is launching Nitrotough™ N100 Diamond at the Edinburgh show – a mechanical protection glove providing the wearer with extremely high grip and abrasion resistance in addition to dexterity and comfort.

Palm fitted with an ultra thin nitrile foam coating, the N100 has been designed with a diamond pattern on the palm that gives it exceptional abrasion resistance and grip, the nitrile layer also provides resistance against any polluted pieces being handled.

The fact it has an ultra thin protective coating, combined with the seamless nylon liner also means that N100 Diamond is extremely flexible, offers excellent dexterity and is extremely comfortable, making it ideal for a range of general handling tasks in addition to quality control and inspection roles where there are no liquids involved.

Available in 5 sizes – 7,8,9,10 and 11 and with an EN 388 rating of 4121 demonstrating its high level abrasion resistance and an EN420 score of 5 confirming its excellent dexterity, N100 Diamond is set to be a valuable addition to Marigold Industrial's world renowned Nitrotough™ family.
