

Love your hands, we do™

November 2007

Out of this world hand protection launched by Marigold Industrial®.

Hand protection specialist Marigold Industrial® has launched Astroflex, an innovative addition to its chemical resistant industrial glove range with food contact approval.

The supported natural latex rubber glove, finished in blue, has been designed to provide wearers with high levels of comfort, dexterity and grip for use in a range of applications.

Astroflex is ideal for those looking for chemical and grip protection within the general janitorial, cleaning and wet and dry handling environments.

Due to its food contact approval it is perfectly suited for those working in the fishing industry, including as diverse environments as oyster bed farming. Astroflex has high durability and a slip resistant pattern on the palm of the glove providing excellent grip in wet conditions.

Astroflex has a CE Complex design and conform to EN374, 388 and 407, is 300 mm long with a double wall thickness of 1.30 mm for added protection and available in sizes 7 to 11.

"Astroflex is a perfect addition to Marigold Industrial's extensive chemical resistant range."

"For those working with chemicals and in the food and fishing industries Astroflex gives optimal grip and durability to provide the perfect balance of protection and comfort for this tough environment." said John Thorne of the Marigold Industrial Ltd.

For more information on Astroflex and on Marigold Industrial's range of chemical resistant protection please call 0845 075 3355, email ukenquiries@marigold-industrial.com or by visit marigold-industrial.com.
