

Love your hands, we do™

June 2008

## PX120 joins the Marigold Industrial® family.

Marigold Industrial® has launched a new glove – ideally suited for those people looking for protection against mechanical handling hazards but needing comfort and dexterity.

The new PX120 offers the wearer particularly good levels of abrasion resistance, making it ideal for those working on production lines or handling small components.

A seamless black nylon glove, which has a polyurethane (PU) coating, PX120 has an ergonomic design providing high degrees of comfort. The flexible fabric aids PX120's dexterity, making it perfect for those people working with small parts and components who need general abrasion resistance.

Lightweight and highly comfortable, PX120 is

manufactured with a ventilated back to enable the hand to breathe naturally.

"The new PX120 gives wearers a range of benefits with the emphasis, as always, on providing protection and comfort," said Marigold Industrial's International Marketing Manager Donald Gillespie.

Available in a range of sizes, from Extra Small through to Extra Large, for further information visit [marigold-industrial.com](http://marigold-industrial.com), call 0845 075 3355 or email [ukenquiries@marigold-industrial.com](mailto:ukenquiries@marigold-industrial.com)
