XRT™ Range brings touch protection for working hands

To help in the fight against workplace hand hazards, Marigold Industrial® has launched a completely new range of gloves – XRT™ - providing excellent protection as well as high level comfort and flexibility for people undertaking a wide range of general tasks.

Designed to protect workers in physically demanding environments who will encounter a range of mechanical hazards every day, the new XRT™ R (red) and XRT™ BK (black), provide an excellent alternative to traditional leather gloves.

Ideal for use as a general all-purpose glove for industries such as engineering, construction, general maintenance and transport, the new XRT™ range combines high comfort and flexibility with general protection excellent abrasion resistance, good grip and good looks.

Manufactured from synthetic leather on the palm, thumbs and fingertips of the glove and a Polyamide/Lycra® liner, the XRT™ range also has an elasticated wrist to keep the glove fitted and a longer cuff to cover the wrist.

"The new XRT™ range provides workers who need a general all purpose glove with a completely new offering and a perfect alternative to traditional leather gloves.

"Not only are the gloves extremely comfortable, but the synthetic leather coating on the palm, thumb and fingertips provides protection against a range of hand general hazards that workers in tough environments will encounter every day," said John Williams, UK Sales Manager, Marigold Industrial Ltd.

Available in sizes 7 to 11, for more information on the new XRT™ range call Marigold Industrial Ltd on **0845 075 3355**, email ukenquiries@marigold-industrial.com or visit marigold-industrial.com.
