MARIGOLD INDUSTRIAL COMBINES EXTRA COMFORT AND CHEMICAL RESISTANCE WITH ITS LATEST GLOVES

Hand protection expert Marigold® Industrial is combining high-level comfort with excellent chemical protection with its two latest products.

The new Nitrile-supported Comfort G26G and Comfort Z51G synthetic protective gloves offer the wearer protection against many solvents and oil based chemicals in the work place as well as having a good resistance to abrasions and high levels of comfort.

Suitable for many industrial applications as well as being food handling compliant, the CE Complex Design Comfort Z51G is a tough, flexible and chemical resistant glove with a long elbow length cuff, providing extra protection for the wearer.

Available in 3 sizes, (8,9 and 10) Comfort Z51G is an ideal glove when handling aggressive oil based chemicals in industries such as chemical, automotive, printing and petroleum related industries.

Its sister glove, Comfort G26G, available in 5 sizes from 6.5 to 10.5, offers the wearer extremely high levels of flexibility and comfort in addition to excellent dexterity, whilst boasting a superior raised grip pattern for enhanced safe handling.

Love your hands, we do™

Also food contact compliant, the green Comfort G26G is an ideal glove for use in food preparation areas as well as the agrochemical industry, crop spraying, chemical and automotive industries.

Enhanced wearer comfort comes from the fact that both gloves support a high-comfort 100% cotton and seamless 13-gauge liner.
