MARIGOLD[®] INDUSTRIAL has a major hand in Olympic developments

With the Olympic Games just over a year away, hand protection expert Marigold[®] Industrial has had a major hand in protecting workers involved in the creation and development of the Olympic sites.

With a wide range of gloves specifically developed for the construction sector, many of the construction firms involved in the building, infrastructure and landscaping of the sites that have been created for the London Olympics have selected Marigold[®] Industrial products to help protect their staff.

Orange PF Insulator

Nitrotough™ N1700

Key products being put to work on Olympic sites include Marigold[®] Industrial's renowned Nitrotough™ N1200, N1300 and N1700 providing rugged protection on construction sites, the PX120 and PX130 used for general maintenance and assembly tasks and the Orange Viz PF Insulator™ which combines thermal protection from cold environments, high level grip and high visibility.

PX120

In addition the company has also seen a range of its disposable products being put to effective use on site.

"The Olympic Development is one of the most significant and exciting construction projects ever seen in the UK and we are delighted that many of our products have been selected by the firms working on the sites across London to help protect the hands of their workers.

Love your hands, we do™

"Many of the UK's leading construction firms have tapped into our range of construction specific gloves, which are backed up by our range of training and educational packages, making us a specialist in the sector.

"In just over a year the eyes of the World will be on the East End of London and for our products to have had a positive impact on the creation of such a major development is something we are extremely pleased about," said Marigold® Industrial's International Marketing Manager Donald Gillespie.
