MARIGOLD® INDUSTRIAL LAUNCHES AEROSTAR PF

The latest glove from Hand & Arm Protection experts Marigold® Industrial Ltd combines technology, dexterity and innovation, making it perfect for those people working on assembly lines, with electronic components and in quality control environments.

The new Aerostar PF glove offers the wearer a palm fit coating that enhances grip and abrasion performance in addition to being resistant to residual oils and greases and water repellent.

Offering excellent comfort, flexibility and dexterity, whilst Aerostar PF is close fitting, the aerated coating also ensures that the hand can breathe thanks to a seamless non-stop manufacturing process, textile liner and fine and stretchable stitches.

DMF and silicone free in addition to being lint free, Aerostar PF glove is ideally suited for those working in white goods manufacturing, electronics or quality control environments where product integrity is a critical requirement in addition to hand protection.

"The emphasis for Aerostar PF is the combination of wearer comfort, grip and product integrity. With an EN420+A1 rating of 5 for dexterity and an EN388 abrasion rating of 4, it is perfect for manufacturing and electronics environments where workers will be handling small components and require precise handling and a light touch," said Donald Gillespie of Marigold Industrial Ltd.
