MARIGOLD INDUSTRIAL® HAP REVIEW GOES LIVE

The latest newsletter, HAP Review, from Hand and Arm Protection experts Marigold Industrial has just gone live on the company's website www.marigold-industrial.com under the News section.

Visitors to the site will be given the option to subscribe so future editions of the newsletter are automatically sent to them. Alternatively, simply visit the site, click on the news section and click on the newsletter page and download the latest edition.

The HAP Review has all of the latest information and developments taking place at the company including announcements on the launch of a brand new corporate DVD, information on its latest products including Hi-Vis, the brand new XRT™ range and the opening of a new European Distribution Centre.

"It has been a very busy start to 2009 which looks set to continue, which is reflected in the contents of our latest newsletter, both from a product and infrastructure perspective.

"The newsletter gives us the opportunity to keep customers up to date with the developments taking place – not just from a product perspective but in terms of the latest marketing and training support materials and infrastructure changes, such as the opening of our new European Distribution Centre, improving product delivery across Europe," said International Marketing Manager Donald Gillespie.

To see a copy of the latest newsletter visit the news section of www.marigold-industrial.com.

VIZ PF INSULATOR™ HELPS KEEP WORKERS SAFE, SEEN AND WARM

Marigold Industrial® is helping companies keep working hands warm and safe this winter with the launch of a new range of high-visibility thermal gloves.

The Orange and Yellow VIZ PF Insulator™ range is ideally suited for those people wearing good, all-round hand protection and though performance in a range of outdoor tasks - from construction and utilities to railway and local authority applications.

In addition to the high-visibility coatings - available in yellow and orange to fit in with common hi-vis clothing - the VIZ PF Insulator™ range helps keep workers' hands warm thanks to the thermal, heavy knit, seamless lining.

The seamless rubber coating on the palm and the fully coated thumb, not only gives good protection and great performance, but also provides excellent wet and dry grip throughout the working day.

Comfort is provided not only in the shape of the warm liner, but the open back also reduces perspiration build up.

Compliant with EN420 General requirements, EN388 (mechanical hazards) and EN1180 (Cuts), the VIZ PF Insulator™ range follows the new hi-vis and hi-visibility standards which allow users to work outdoors in the winter.

There is no more feeling like having cold hands when working outdoors. Not only is it extremely uncomfortable but also reduces grip and feeling, which is itself a complete worker safety. The new VIZ PF Insulator™ range not only helps keep the hands warm, but also provides the wearer with good all-round protection where physical tasks are being undertaken.

The additional benefits of good wet and dry grip from the glove's coating, durability and comfort mean the VIZ PF Insulator™ range is ideal choice for anyone working outdoors. - add title
